

About Cerner Validation

Dec2017.

SATO WS4 compact desktop label printers are fully Cerner Validated peripheral devices for native use within Cerner Health IT system to ensure safety, quality and efficiency for patients.

SATO WS4 printers are designed for wide use through the healthcare supply chain, notably for printing of patient wristbands, specimen pathology labels and other labels used in hospitals. They can be deployed through various legs of the supply chain from clinical labs to pharmacies, medical check-up centers, clinics and hospitals.

SATO is a GS1 Healthcare member and works to promote widespread serialization through the global healthcare supply chain to ensure patient safety and comfort.
